Based on Hospital Process of Care Measures – National Average

Condition	Category	Measure Name
Heart Attack Patients Given Aspirin at Arrival	Heart Attack or Chest Pain	National Average of Hospitals submitting data:
Heart Attack Patients Given Fibrinolytic Medication Within 30 Minutes of Arrival	Heart Attack or Chest Pain	National Average of Hospitals submitting data:
Heart Attack Patients Given PCI Within 90 Minutes of Arrival	Heart Attack or Chest Pain	National Average of Hospitals submitting data:
Heart Attack Patients Given ACE Inhibitor or ARB for Left Ventricular Systolic Dysfunction (LVSD)	Heart Attack or Chest Pain	National Average of Hospitals submitting data:
Heart Attack Patients Given Smoking Cessation Advice/Counseling	Heart Attack or Chest Pain	National Average of Hospitals submitting data:
Heart Attack Patients Given Aspirin at Discharge	Heart Attack or Chest Pain	National Average of Hospitals submitting data:
Heart Attack Patients Given Beta Blocker at Discharge	Heart Attack or Chest Pain	National Average of Hospitals submitting data:
Heart Attack Patients Given a Prescription for a Statin at Discharge	Heart Attack or Chest Pain	National Average of Hospitals submitting data:
Heart Failure Patients Given Discharge Instructions	Heart Failure	National Average of Hospitals submitting data:
Heart Failure Patients Given an Evaluation of Left Ventricular Systolic (LVS) Function	Heart Failure	National Average of Hospitals submitting data:
Heart Failure Patients Given ACE Inhibitor or ARB for Left Ventricular	Heart Failure	National Average of Hospitals submitting data:

Inhibitor or ARB for Left Ventricular Systolic Dysfunction (LVSD)		data:
Heart Failure Patients Given Smoking Cessation Advice/Counseling	Heart Failure	National Average of Hospitals submitting data:
Pneumonia Patients Given Initial Antibiotic(s) within 6 Hours After Arrival	Pneumonia	National Average of Hospitals submitting data:
Pneumonia Patients Whose Initial Emergency Room Blood Culture Was Performed Prior To The Administration Of The First Hospital Dose of Antibiotics	Pneumonia	National Average of Hospitals submitting data:
Pneumonia Patients Given the Most Appropriate Initial Antibiotic(s)	Pneumonia	National Average of Hospitals submitting data:
Pneumonia Patients Given Smoking Cessation Advice/Counseling	Pneumonia	National Average of Hospitals submitting data:
Pneumonia Patients Assessed and Given Pneumococcal Vaccination	Pneumonia	National Average of Hospitals submitting data:
Pneumonia Patients Assessed and Given Influenza Vaccination	Pneumonia	National Average of Hospitals submitting data:
Surgery Patients Who were given an Antibiotic at the Right Time (Within One Hour Before Surgery) to Help Prevent Infection	Surgical Care Improvement Project	National Average of Hospitals submitting data:
Surgery Patients Whose Preventive Antibiotics were Stopped at the Right Time (Within 24 Hours After Surgery)	Surgical Care Improvement Project	National Average of Hospitals submitting data:

## Time (Within 24 Hours After Surgery)

Patients Who got Treatment at the Right Time (Within 24 Hours Before or After Their Surgery) to Help Prevent Blood Clots After Certain Types of Surgery

Surgical Care Improvement Project National Average of Hospitals submitting data:

Surgery Patients Who were Taking Heart Drugs called Beta Blockers Before Coming to the Hospital, Who were Kept on the Beta Blockers during the Period just Before and After their Surgery

Surgical Care Improvement Project National Average of Hospitals submitting data:

Surgery Patients Who were Given the Right Kind of Antibiotic to Help Prevent Infection

Surgical Care Improvement Project National Average of Hospitals submitting data:

Heart Surgery Patients Whose Blood Sugar (Blood Glucose) is Kept Under Good Control in the Days Right after Surgery

Surgical Care Improvement Project National Average of Hospitals submitting data:

Surgery Patients Needing Hair Removed from the Surgical Area Before Surgery, who had Hair Removed Using a Safer Method (Electric Clippers or Hair Removal Cream – Not a Razor)

Surgical Care Improvement Project National Average of Hospitals submitting data:

Patients having Surgery Who were Actively Warmed in the Operating
